**3-6-9 horizontal axis = this is emotional axis.**

The x's next to the numbers in the first table (cross) show that during your life you spend most of your energy on material things (money). All this means that the most important life goal for you is to gain and achieve financial security. The next area in which you invest a lot of energy is your career, as well as grooming, beauty, and a healthy lifestyle. You spend the least amount of energy on emotions, although it seems that they are less important to you, but this is not the case, you just don't want to invest energy in it, you leave its achievement and survival to fate. *I made the characterization written here based on your birth data, i.e. this is the state that existed at birth, it is up to you whether you leave it as it is or change your personality!*

The following data, expressed in percentages, show how important certain areas of your life are to you. Your main center of gravity is on the number 8 (material), which I have marked with 2 large Xs in the 2nd cross. The next center of gravity on the vertical axis is 7-8-9 - the number of future and great loves - there is, **I marked this with blue color** - 9 times.

Az Below you can see, in %, how important each area of your life is to you.

Horizontal axes:

**1-4-7 = Your current life = 30%**

**2-5-8 = Your material life = 60%**

**3-6-9 = Your emotional life = 10%**

Vertical axes:

**1-2-3 = Your past = 20%**

**4-5-6 = Your present = 20%**

**7-8-9 = Your future and its goals = 60%**

For you, the main center of gravity is on the 2-5-8 horizontal axis and the number 8 (future & material world). The theme of the aforementioned axis is: financial security, future goals, the future life of yourself and your future family. Regarding the future, you are mostly concerned with financial matters, because you want financial security for yourself and your future family. That is why you set long-term goals and your decisions and world of thought are strongly determined by the search for and exploitation of future opportunities.

**Past:** You are strongly attached to your past, you have difficulty letting go of your material and financial heritage, they are very important to you because you feel that you belong even more to the past (parents, grandparents and educators and helpers with fond memories).

**Difficulties:** Throughout your life, you will encounter the most challenges and difficulties in the area of your present and future emotional life - the intersection of the vertical 7-8-9 & horizontal 3-6-9 axes. *You have to do something to keep your feelings alive, but you don't want to do it, even though your feelings need to be nurtured, e.g. with romance, kindness, and shared activities!*

Your disease tendencies:

You were born in the month of Capricorn, so you are prone to: diseases of the knees, skin, stomach and breasts, and due to the absence of the digits **3** and **6**, diseases of the right hip and right leg (number 3) and (number 6) genitals diseases. Furthermore, you were born on the **7th**, so you are prone to diseases of the left eye, left ear and left arm.

**Passing away:** I only write about this for old and/or sick people and you are still young.

Since you have a birthday number of 7 ( $25 = 2+5 = 7$ ), your primary critical years are the following: **25, 34, 43, 52, 61, 70, 79, 88.** and the **97.** life years. I have marked the most critical years of his life in red. In her above years of life (**more gradually in the ones marked in red!**) there is a risk of prolonged and/or difficult-to-heel (curable) illness!

Secondarily critical life years: **1, 4, 10, 13, 19, 22, 28, 31, 37, 40, 46, 49, 55, 58, 64, 67, 73, 76, 82, 85, 91,** and finally **94** years old. The secondary years of life are of lesser importance. That is, for your health, all those turns of fate that are the same as your primary or secondary critical life years are important. So, you should take extra care of your health especially in your primary critical years of life, but especially in the years **marked in red!**
